Hi, all.

Attached please find an evaluation of bids received for the non-regulated soils (<50 ppm PCBs) and C&D debris generated from the demolition of the site building and removal of the underlying concrete foundation.

Republic Services is the apparent low bidder for these wastes as well. The landfill specified is the Pleasant Oaks Landfill in Mt. Pleasant, Texas (Class 1).

I agree with Gary's comments that the transportation pricing appears high. Evan and I will evaluate the costs of alternate approaches (i.e. direct subcontract and/or use of ER trucks and drivers).

I will formally notify all responsive bidders tomorrow afternoon of our intent to award, pending submittal of all applicable FAR flow-down clauses and certifications, certificate of insurance naming ER and EPA as additional insured (landfill must also forward a specimen as well), and any other vendor submittals required prior to formal award.

Regards,

Don
